

Manisha Prajapati

Python Developer

I am a Python Developer with 3 months experience software applications. I have a strong background in object-oriented programming, web development, and data analysis. My best qualities are my attention to detail, problem-solving skills, and ability to work effectively in fast-paced environments. In addition, I possess excellent communication skills and an in-depth understanding of Python programming language, SQL databases, HTML/CSS/JavaScript. I am confident that my qualifications make me an ideal candidate for the position.
